OBJECTIVES

- To ensure a safe and healthy work environment for all workers that complies with applicable legislation, standards, accreditations, and organizational governance, and which promotes their health, safety, and well-being.

PRINCIPLES

Alberta Health Services (AHS) is committed to providing a healthy and safe work environment and to managing its operations in a manner that protects and maintains the health and safety, including physical, psychological, and social well-being of workers. This is in alignment with Our People Strategy, the Code of Conduct, the principles of a just culture, and the AHS Values.

The health and safety of workers is fundamental to the provision of safe and quality health services.

All incidents can be prevented and/or mitigated as reasonably practicable. Workers at all levels are obligated to take reasonable care to protect the health and safety of themselves and other persons and to help prevent or mitigate future incidents and their severity.

Health and safety is a shared responsibility between individuals, teams, and leadership. Everyone has an obligation to assist in identifying, communicating, preventing, and, where necessary, correcting unsafe conditions and situations in the workplace.

Workers that feel safe, healthy, and valued in the work environment are necessary for AHS to advance patient and family-centred care.
APPLICABILITY

Compliance with this document is required by all Alberta Health Services employees, members of the medical and midwifery staffs, students, volunteers, and other persons acting on behalf of Alberta Health Services (including contracted service providers as necessary).

ELEMENTS

1. **AHS Senior Leader Responsibilities**

   1.1 All AHS **Senior Leaders** are responsible for:

   a) attending training to ensure that they understand their obligations for health and safety in the workplace;

   b) complying with health and safety legislation, policies, procedures, safe work practices, programs, and directives;

   c) ensuring AHS workers (excluding **contracting employers** and **service providers**) have access to the training and resources needed to be **competent** and safe at work; and

   d) setting health and safety objectives, leading and promoting continuous improvement of health and safety performance, and taking appropriate actions to prevent incidents in their department or portfolio through the implementation of safety practices and programs.

2. **AHS Leader Responsibilities**

   2.1 All AHS **Leaders** are responsible for:

   a) attending training to ensure that they understand their obligations for health and safety in the workplace;

   b) ensuring AHS workers use the training and resources needed to be safe at work;

   c) ensuring that AHS workers are competent or are supervised by a competent AHS worker;

   d) ensuring that all department **Hazard Identification, Assessment, and Control** (HIACs) documents are reviewed and updated with workers regularly, and provide workers with resources to control and mitigate workplace risks in order to ensure healthy and safe work environments;

   e) working collaboratively with AHS workers to complete incident and **hazard** investigations by ensuring the appropriate root causes have been identified and corrective actions have been implemented and communicated;
f) proactively identifying hazards and implementing strategies to reduce the
number of work-related injuries, illnesses, property damage incidents, and
workplace violence and harassment incidents within AHS through the use
of the Workplace Health and Safety Management System; and

g) working collaboratively with all internal and external stakeholders to
ensure continuous improvement of health and safety performance.

3. AHS Worker Responsibilities

3.1 All AHS workers are responsible for:

a) attending training to ensure that they understand their obligations for
health and safety in the workplace;

b) taking every reasonable precaution to prevent or avoid hazards that may
cause work-related injuries, illnesses, property damage, and workplace
violence and harassment;

c) participating, as required by AHS, collective agreements, or legislation, in
health and safety investigations and working collaboratively with
management to identify root causes and implement appropriate corrective
actions;

d) participating, as required by AHS or legislation, in workplace inspections
and other initiatives to proactively identify and control hazards in the
workplace;

e) participating in the development, review, and updating of HIAC
documents related to their job position and being aware of any potential
hazards and the appropriate controls related to those hazards;

f) complying with controls (elimination/substitution, engineering,
administrative, and personal protective equipment) identified in their
department HIAC documents and other documents identifying controls
necessary to ensure a safe and healthy workplace; and

g) reporting all workplace hazards and incidents directly to their supervisor
and in MySafetyNet.

4. Workplace Health & Safety Responsibilities

4.1 Workplace Health & Safety is responsible for developing, implementing,
monitoring, and continually improving a strong Workplace Health and Safety
Management System based on the CSA Group Standard Z45001 - Occupational
health and safety management systems and the CSA Group Standard Z1003 –
Psychological Health & Safety in the Workplace standard for understanding and
managing organizational risks.
5. **Delegation by the AHS Executive Leadership Team**

5.1 The AHS Executive Leadership Team is committed to high standards of health and safety in the workplace. The AHS Executive Leadership Team delegates responsibility to the Senior Program Officer, Workplace Health & Safety to establish, manage, and operate an organization-wide Workplace Health and Safety Management System.

6. **Workplace Health and Safety Management System**

6.1 The Workplace Health and Safety Management System and related programs and services shall include, but are not limited to, the following elements:

a) Leadership, Commitment, and Participation;

b) Objectives and Targets;

c) Risk Management;

d) Legal and Other Requirements;

e) Operational Controls and Procedures;

f) Competence, Training, and Awareness;

g) Occupational Health;

h) Procurement and Contractor Management;

i) Incident Reporting, Investigation, and Management; and

j) System Evaluation and Corrective Action.

7. **Contracted Service Providers**

7.1 All contracted service providers are responsible for:

a) having a health and safety management program as required by Alberta Occupational Health and Safety legislation;

b) participating in AHS joint workplace health and safety committees when applicable;

c) working collaboratively with AHS to ensure the health and safety of workers at the worksite, and

d) holding valid Workers Compensation coverage where applicable.
DEFINITIONS

AHS worker means AHS employees, members of the medical and midwifery staffs, students, and volunteers, but excludes contracting employers and service providers.

Competent means ensuring that AHS workers are adequately qualified, suitably trained and with sufficient experience to safely perform work without supervision or with only a minimal degree of supervision.

Contracting employer means a person, partnership or group of persons who, through a contract, an agreement or ownership, directs the activities of one or more employers involved in work at a work site.

Hazard means a source of potential harm to a worker, property or environment.

Incident means an unplanned event that may result in, or does result in an undesirable consequence. Incidents include all occupational injuries / illness, damage to property and equipment, and all near-miss events.

Leader means supervisors, managers/medical leaders, executive management, and all senior leaders.

Senior Leader means the President and Chief Executive Officer, all executive positions that report directly to the President and Chief Executive Officer, and any other positions so designated by the President and Chief Executive Officer.

Service provider means a person who provides training, consultation, testing, program development, or other services in respect of any occupation or work site.

Supervisor means a person, whether unionized or non-unionized, who has charge of a work site or authority over an AHS worker.

Worker means AHS employees, members of the medical and midwifery staffs, students, volunteers, and contracting employers and service providers.

Workplace Health and Safety Management System means part of the overall management system that facilitates the management of the WHS risks associated with the business of the organization. This includes the organizational structure, planning activities, responsibilities, practices, procedures, processes, and resources for developing, implementing, achieving, reviewing, and maintaining the organization’s WHS policy.
